

IGOR VLADOVSKIY

Technical Product Manager / AI Product Builder

Serbia-based, open to remote, igor@vladovskiy.com, linkedin.com/in/igor-vladovskiy, vladovskiy.com

SUMMARY

Technical Product Manager and AI Product Builder with 9+ years building AI-powered search, visual search, ML/API products, SEO-driven growth, internal tools, and early-stage AI products. Former Senior Product Manager at Everypixel; helped grow stock-image search to 200k+ MAU, with peak traffic up to about 500k visits/day, and productized internal ML into B2B APIs. Since 2024, building AI products across text-to-3D, patent intelligence, context-aware translation, and creative automation. Strong at turning ambiguous AI ideas into usable product loops, technical workflows, and shipped products.

WORK EXPERIENCE

Independent AI Product Builder / Founder

Self-employed, Apr 2024 to Present

Built and launched independent AI products and internal tools across text-to-3D generation, patent intelligence, browser translation, and creative automation.

- **Oriform, text-to-3D product (Mar 2026 to Present):** shipped the core loop for an alpha text-to-3D product: natural-language request, AI-generated OpenSCAD model, preview, iterative refinement, and STL export for 3D printing.
- Improved reliability for non-deterministic AI output with preview/apply separation, reviewable patches, versioning, canonical OpenSCAD representation, and safer handling before model changes are committed.
- **Use Case Library, patent-to-use-case pipeline (2025):** created a pipeline that turns patent records into structured applied-AI use-case pages, covering ingestion, problem extraction, AI/CV task mapping, SEO metadata, vendor discovery, and static HTML publishing.
- Added quality controls including relevance screening, a Gemini-based evaluation gate, and pre/post-build validation to filter weak or low-quality pages before publishing.
- **ContextTranslate, Chrome extension (2025):** built and launched a Chrome extension for context-aware Gemini translation across 90+ languages, using selected text plus surrounding context, a bring-your-own-key privacy model, no developer-side text servers, and local history.
- **Creative studio AI tooling (2025 to 2026):** turned ad hoc browser ChatGPT use into repeatable AI-assisted creative workflows with a password-protected web UI, user accounts, usage tracking, and API-backed image/video generation.

Everypixel / Everypixel Labs

Product Manager to Senior Product Manager, Feb 2015 to Apr 2024

AI-powered image search, visual search, ML APIs, and digital content tools.

AI Search, Growth & Visual Search

- Helped grow Everypixel's AI-powered stock-image search product to 200k+ MAU, with peak traffic up to about 500k visits/day, by improving search quality, SEO landing pages, category architecture, visual/reverse search, similar-image search, UX, launch campaigns, and traffic growth.
- Acted as the product bridge between R&D, engineering, design, marketing, and sales, turning search relevance, image understanding, and discovery problems into shipped improvements.
- Supported launches that earned Product Hunt Product of the Day / Week and 300+ media mentions through product positioning, launch campaigns, and content distribution.

Everypixel Labs / ML API Products

- Productized internal ML capabilities into B2B API products for keywording, visual recognition, age detection, and content moderation use cases.
- Owned API packaging, pricing, usability, customer communication, sales support, and R&D feedback loops, translating customer needs into model and API improvements.

EPX, Blockchain-Based Digital Content Experiment

- Led product work on EPX, a blockchain-based digital content distribution experiment, including product concept, economic/reputation mechanics, white paper, investor materials, and implementation coordination.

Povietnamu Guidebook

General Manager / Head of Sales, Feb 2012 to Feb 2015, Vietnam

Tourist guidebook and media business.

- Managed sales, distribution partnerships, offline media, and digital audience growth, acquiring 100+ clients and growing Povietnamu.ru from near-zero to 30k MAU.
- Increased distribution partnerships 6x and moved the business from loss-making to profitable.

SELECTED LINKS / PROOF OF WORK

Oriform oriform.io - text-to-3D product alpha: natural language to 3D-printable objects

Use Case Library usecaselibrary.org - published patent-to-AI-use-case pipeline and library

ContextTranslate [Chrome Web Store](#) - context-aware Gemini translation extension
